

ORDER PORTAL FEATURE

Great for both your customers
and sales representatives

This feature was built with the intention of saving your business money, as well as easy accessibility for both your sales representatives and customers. They can access the portal from any mobile device at their convenience, browse products available and order the quantities they desire.

Saving Time for you and your customers

A secure and efficient way to gather information by bypass queues, and avoid waiting on return calls and emails. Both the company and customers will have access to the information they are looking for, including copies of invoices, due dates, order status and past order history. This enables your customers to have access to a wide variety of information without having to call you, creating a sense of ownership for your customers. The functionality of the application allows your staff more time to focus on solutions for problems or opportunities for increased sales. The decreased work load allows the staff to take on more customers and still provide a higher level of customer care.

Remote Office

Whether on vacation, in the office or at home, customers can place orders from anywhere on any device.

Standing orders

Manually entering orders can result in mistakes, Routeique's standing order management allows automatic orders for each month or week but also the ability to change or add to them at any time.

Customer Retention

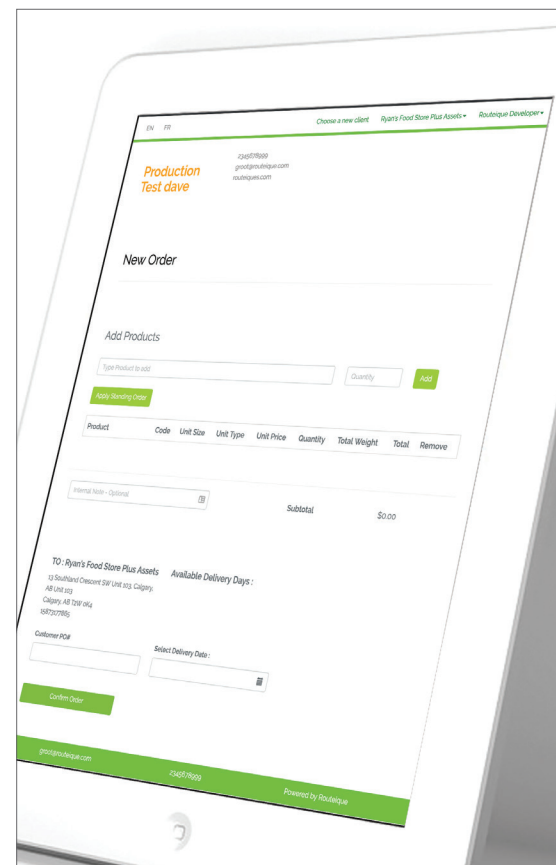

Customer loyalty is earned repeatedly, every interaction your customer has with your company will help or hurt this relationship

Reduced Accounting Costs

Data entry takes time, and time is money. The order portal can be integrated with your accounting system in order to reduce time spend with manual entry, it will also decrease the need to double check the manual data entry.

All said and done

The order portal allows wholesalers, manufacturers and distributors the power to reduce costs while increasing customer service. Some of our customers have reported saving of up to 50% in this area of their operation.
