

ROUTE PLANNING & OPTIMIZATION FEATURE

Intelligent optimization with no surprises

Intelligent delivery scheduling & Optimized route planning

Many factors define an optimum route for your deliveries; Even something as simple as a canceled order can throw a wrench into the works. With Routieque's powerful optimization tools, you can adjust routes based on the most current activities in your database, with no surprises. It accounts for your customers specific delivery window requests, adapting and adjusting routes as the drivers are delivering orders day by day. It's more than a GPS, it's a customer service tool. Routieque even has routing specialists standing by to assist with developing new routing and adjusting routes that already exist. After all, time is money, and an optimal route will save you both.

Flexible and Easy

Routes can be planned in seconds using complex calculations. With 95-98% accurate optimization, lost opportunity costs are reduced significantly. Also reserves the ability to edit routes after optimization to accommodate for last minute changes or customer requests.

- ✓ Delivery windows - add and accommodate customer constraints.
- ✓ Daily re-optimization - advanced algorithms allow plans to be recalculated in seconds.
- ✓ Order Optimization - automatically matches orders with proper vehicle and route.

Improved Satisfaction

- ✓ Driver satisfaction will be improved through reduced delivery hassles to increase productivity and avoid frustration.
- ✓ Optimal route planning also provides environmental benefits by reducing your carbon footprint.

War Room Map Feature

- ✓ The ability to monitor what your drivers are doing on the road helps you communicate to your customers their estimated time of delivery Improving driver productivity.

Improved accuracy

- ✓ Customer service will be improved by aligning the sales process with warehousing and transportation, improving information flow. This allows better understanding of where your trucks are and the status of each delivery.
- ✓ Improved reporting of routes and analytics allows you to track gross profit per truck, fuel used, miles traveled etc. Ensuring accurate real time data of the delivery at the correct location

Cost Savings

- ✓ Cost Savings through better routes and reduction of distance traveled enables you to keep a check on fuel expenses ensuring optimal use of your resources.
- ✓ Overall cost savings gives you the ability to expand your business but not your bottom line.
