

DIGITAL CONTROL TOWER

To serve your ever-evolving supply chain, meet customer demands, and stay agile, you need overall visibility into your network while having full control over your information at all times.

Meet the Routeique™ Digital Control Tower.

Optimize Your Logistics Decisions

Never again do you need to access multiple programs, scour emails from accounting, or spend hours sorting through paper files to find and gather the necessary data you need. The Routeique™ Digital Control Tower makes it easy and seamless to make informed decisions and optimize overall processes using real-time data.

Stay Informed

- Daily, Weekly, and Monthly Order Values.
- Perfect Orders for the Month.
- A list of scheduled orders, with key essential details, like:
 - Invoice number
 - Customer name
 - Delivery status
 - Order type

Once you've checked out your dashboard overview, you're informed and ready to manage other aspects of your supply chain.

Seamlessly Manage Details

The Routeique™ Digital Control Tower makes it easy to manage essential details in easy-to-navigate tabs:

Customers

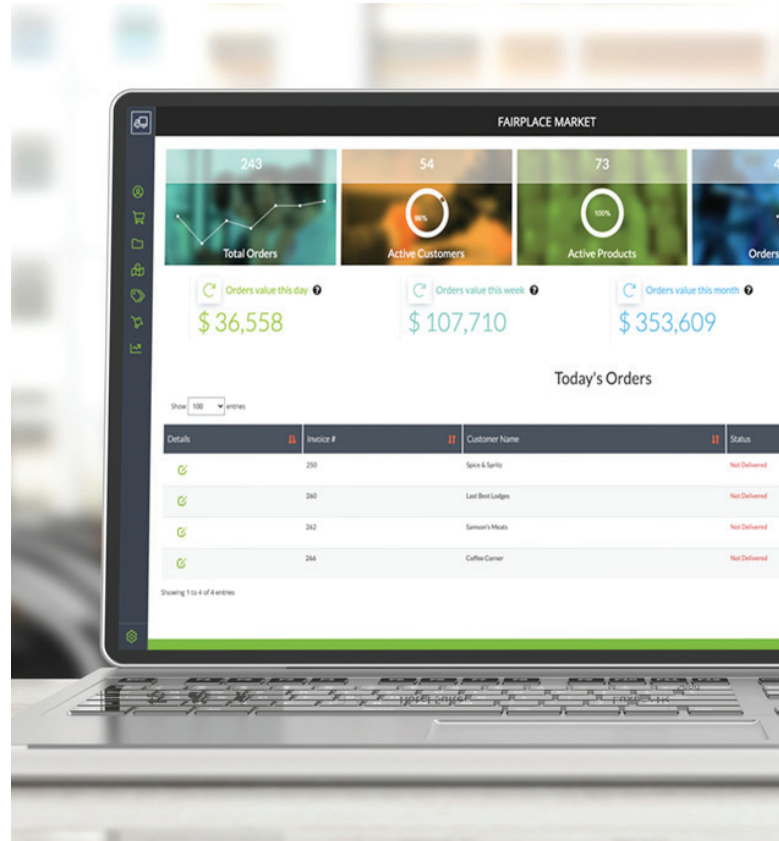

- Add and edit customer profiles.
- Manage customer:
 - terms, tax, and price plans
 - routes and delivery windows
- Find their Geo-code for GPS tracking.
- View info about a customer's recurring orders.

Orders

- Create, edit, and search for orders.
- Create automatic order plans for your customers.
- Set up payments.
- Track orders on their routes.

Routes

- Maintain routes from one central location for convenient management.
- Manage your vehicle information.
- View driver's time reports, giving you immediate visibility of your fleet.
- Set specific schedules, zones, and other important route information.

DIGITAL CONTROL TOWER

Products

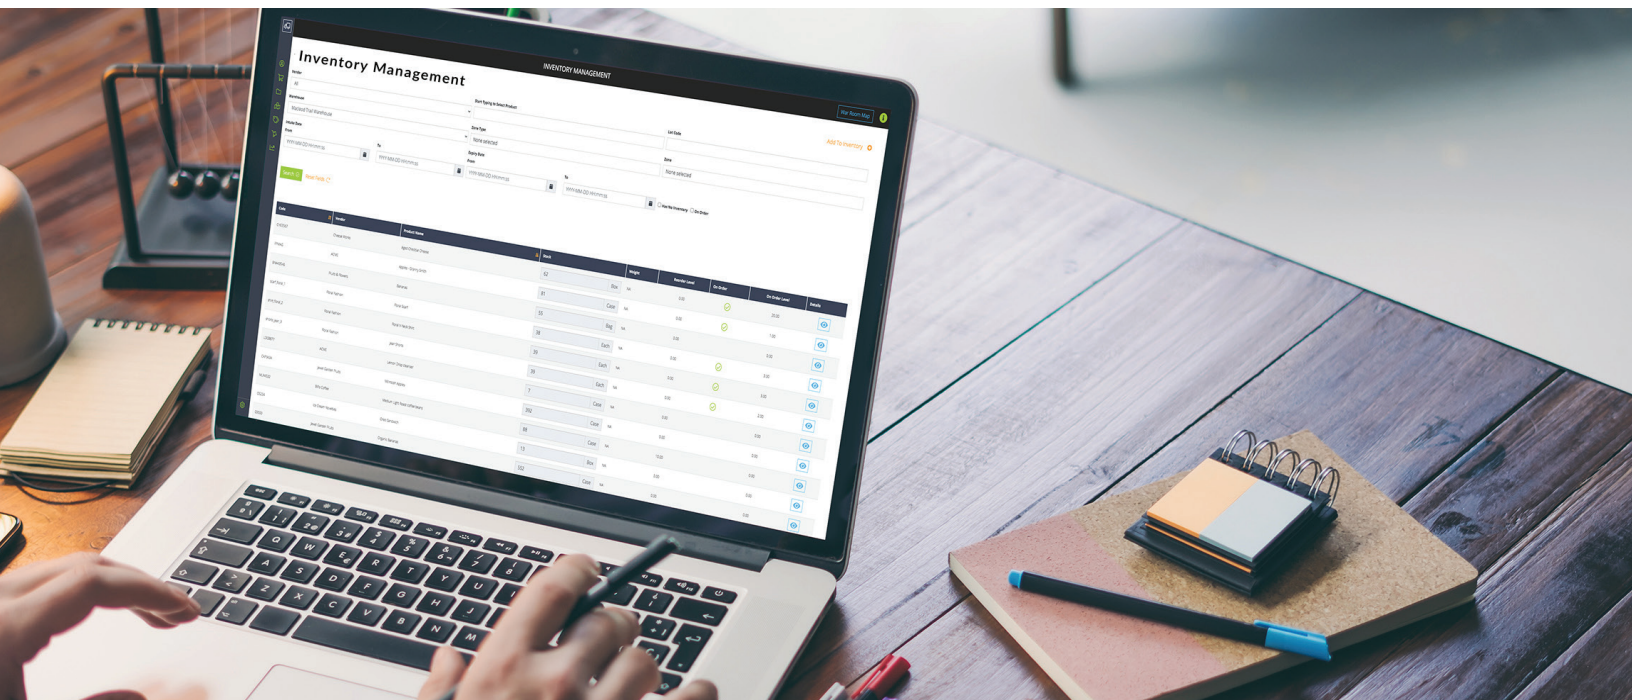

- Create new products with detailed information like deposit and levy, case sizes, and weights.
- Keep track of vendors.
- Set specific terms.
- Implement product price plans.
- Upload product images for use on the Customer Order Portal.

Inventory

- Create, search, and receive purchase orders.
- Manage your inventory levels and zone locations.
- Move items between zones, restock items and view expiry reports.
- Pick and load orders.

Reports

- Create pick lists.
- Access your accounts receivable overview and the payment status of invoices.
- View a wide range of reports on:
 - products
 - customer price
 - reason codes
 - orders by routes summary
 - combined sales
 - delivery sequence
 - or make a custom one!

The Routeique™ Digital Control Tower allows you to optimize your processes and increase visibility, leading to cost reductions, more efficient operations, and a more agile supply chain.
